

# Lancaster County Mutual Aid Association

*Invites You to Participate In*

## **MINI FIRE SCHOOL**

**Saturday, March 26, 2005 from 8:00 a.m. – 4:00 p.m.**

**Southeast Community College – Lincoln Campus**

### Courses

**100 Live Fire Training (6 hours)**

***Propane Emergencies:*** This course is designed to increase firefighter awareness of hazards and operations when dealing with propane. Classroom session is three hours of discussion on scene size-up, tactical considerations, fixtures and safety devices, incident management, physical and chemical properties of propane, BLEVE, evacuation distances, and flow requirements for cooling tanks. The hands-on session is three hours dealing with simulator tank, establishing water flows, managing resources, and safely controlling propane incidents. *Class will be limited to 25 participants. Anyone participating in this course must bring turnout gear and breathing apparatus. (Instructor – Nebraska State Fire Marshal)*

**200 Emergency Operations Management with Simulation (6 Hours)**

***Incident Command Systems:*** Through this course, you will attain additional skills to assist you in developing and implementing an incident action plan, in conjunction with an IMS, to enhance firefighter safety and development. You will become familiar with the basic concepts of: ICS/scene safety, size-up, initial report and the command sequence, developing and implementing an action plan, tactical considerations, building construction and apparatus placement. *Class will be limited to 40 participants. (Instructor – Nebraska State Fire Marshal)*

**300 “Taking Care of Our Own” (3 Hours)**

This course will provide an overview of the difficulty fire departments will face resulting from a tragic line of duty death. In this course, you will cover case histories from in the line of duty deaths (LODD) from recent past as well as what we can do to prevent LODD's, roadside safety, what your probies should know before they respond to emergencies, what you need to do and know if your department suffers a LODD, stress recognition and management. *There will be no limit to the number of participants in this class. (Instructors – Firefighter/Paramedics Mark Bonser and Gary Mead, Grand Island Fire Department)*

**400 EMT Basic Lecture & Skills Lab (3 Hours)**

This course will provide a one-hour lecture on patient assessment and understanding when to use specific transport devices along with a two-hour skills lab which will include; combi-tube, spinal immobilization, KED, Sager splint, extremity splinting (cardboard splints) and wound management. *There will be no limit to the number of participants in this class. (Instructor – Todd Gilkison, NREMT-P/Asst. Executive Director, Emergency Medical Services Incorporated)*
